- ▷ Resolve all of the user's onchain identities
- ▷ ENS, Farcaster, Lens
- ▷ Usernames, handles, bios, images, follows, metadata
- ▷ Bi-directional resolution (e.g. from a Lens handle get ENS, Farcaster, etc.)

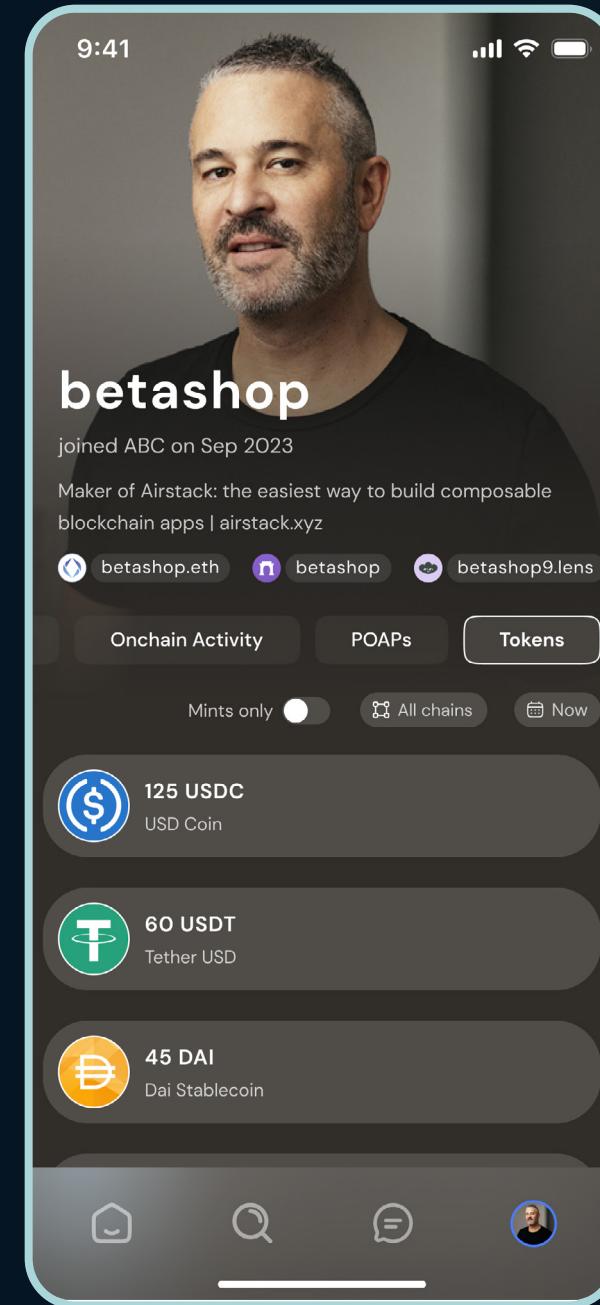

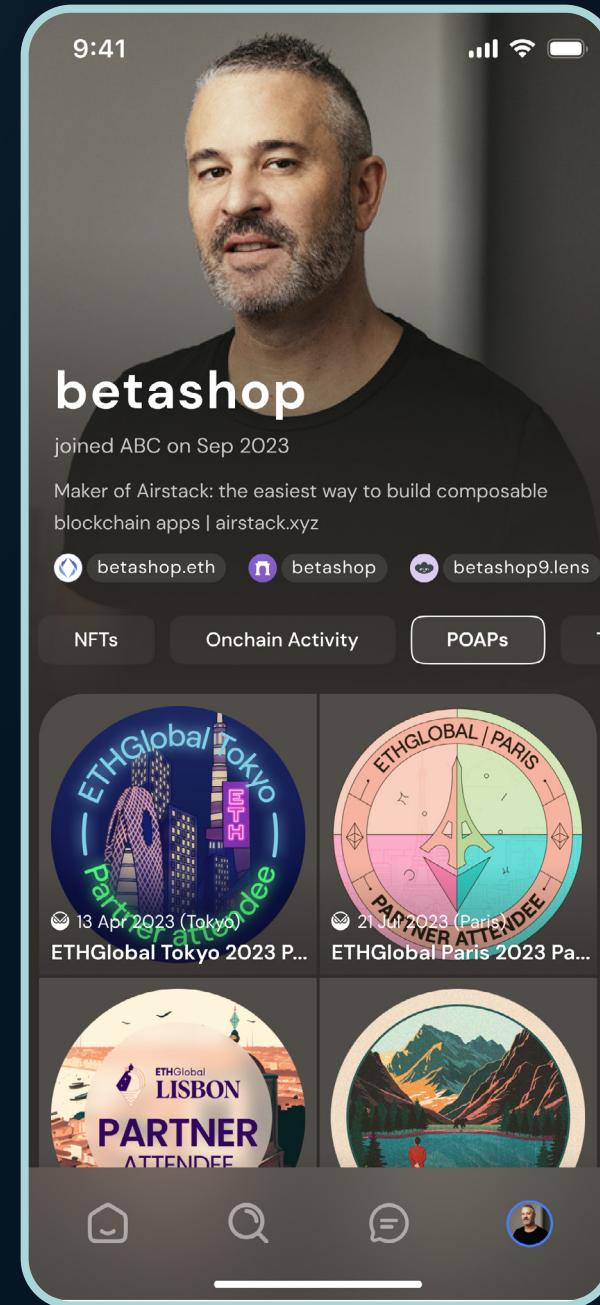

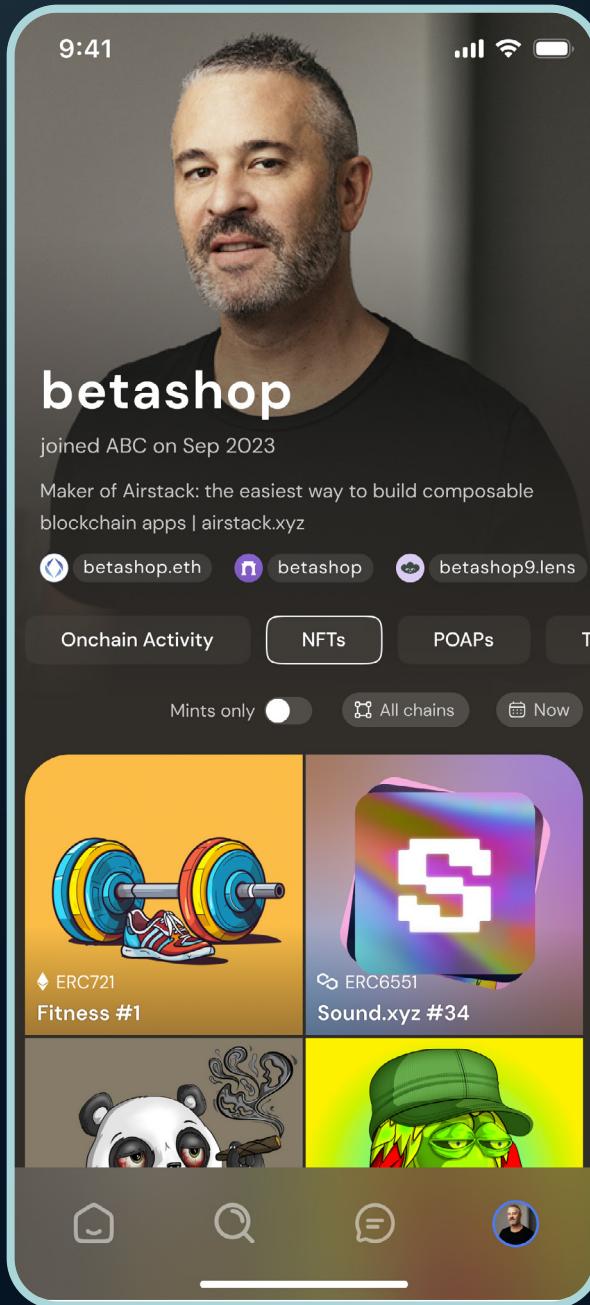

- ▷ Universal Onchain Contacts!
- ▷ Instantly display all of the user's contacts from Farcaster, Lens, and Token Transfers in your app
- ▷ Can also extend to POAPs and NFTs in common as desired
- ▷ Invite via XMTP (coming soon via Airstack Onchain Contacts SDK)

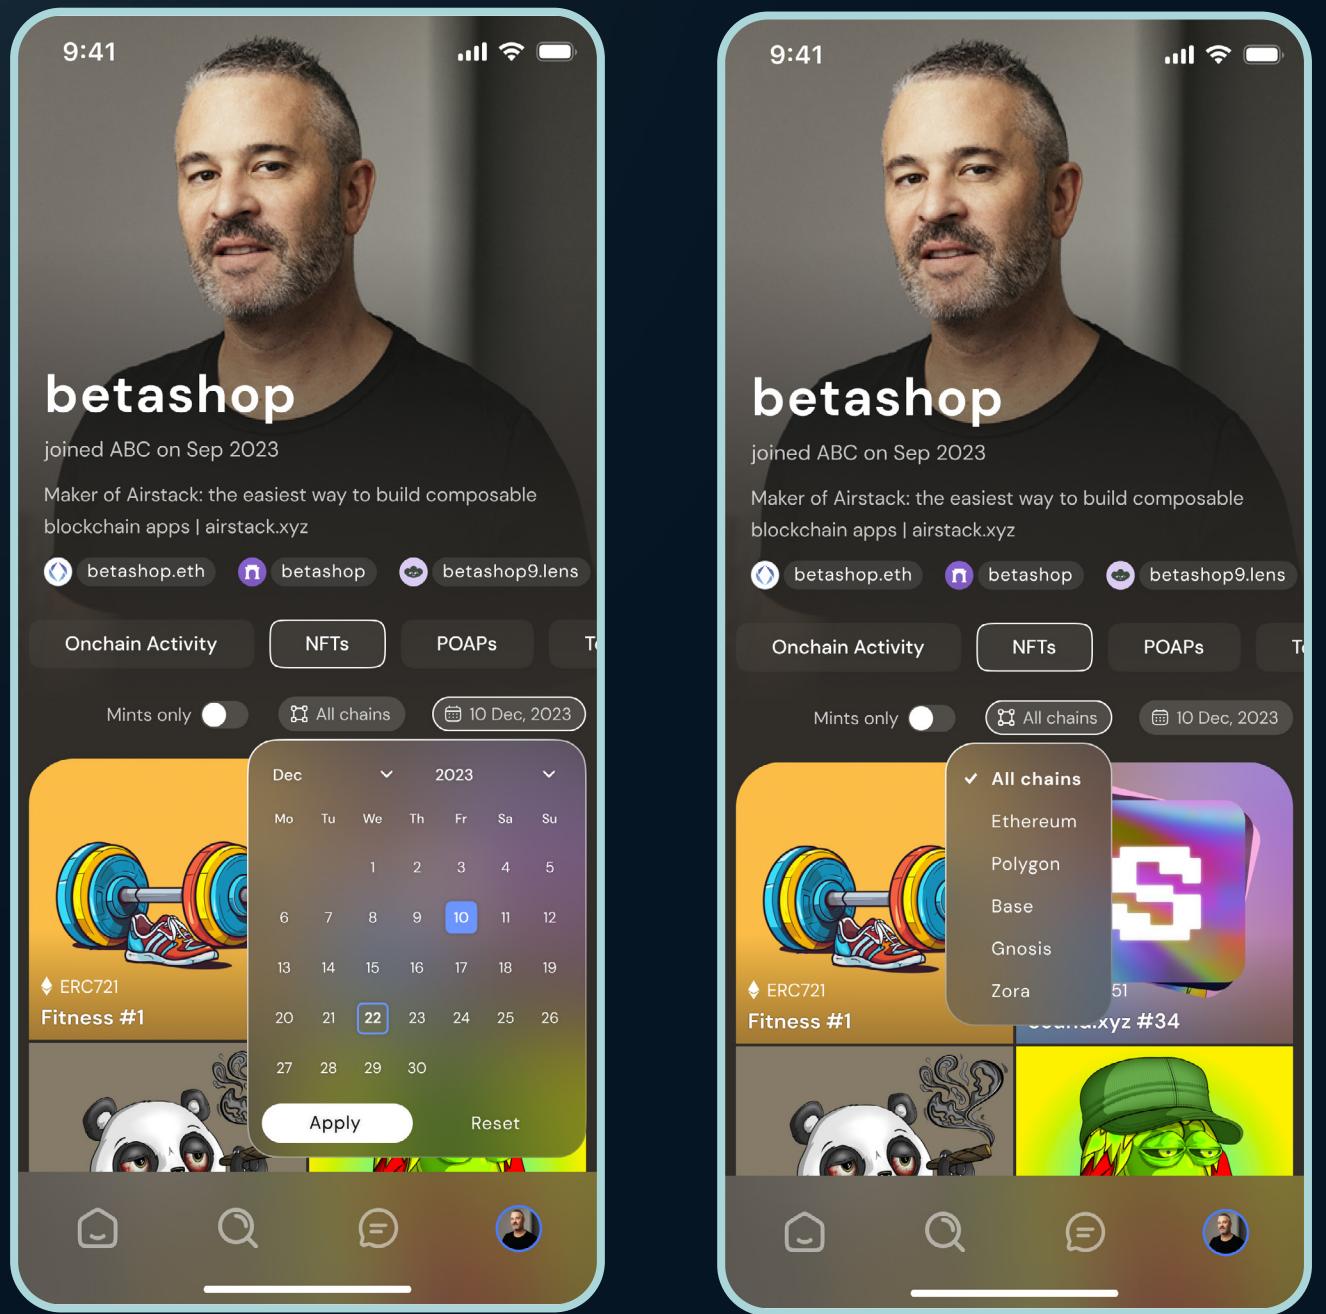

- ▷ All of the contact's details from ENS, Lens, Farcaster
- ▷ The user's relationship with that user & match score
- ▷ Token transfer history
- ▷ Tokens in commons

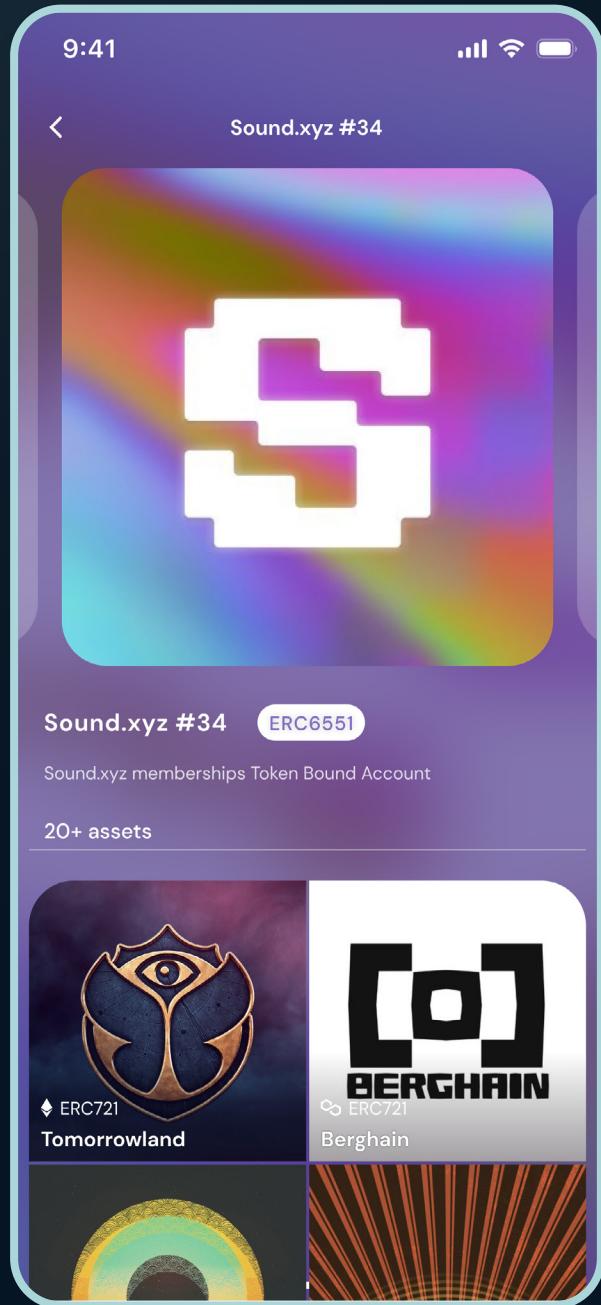

- ▷ Drill into their entire onchain graph
- ▷ Token transfers
- ▷ NFTs in common
- ▷ POAPs
- ▷ Farcaster
- ▷ Lens

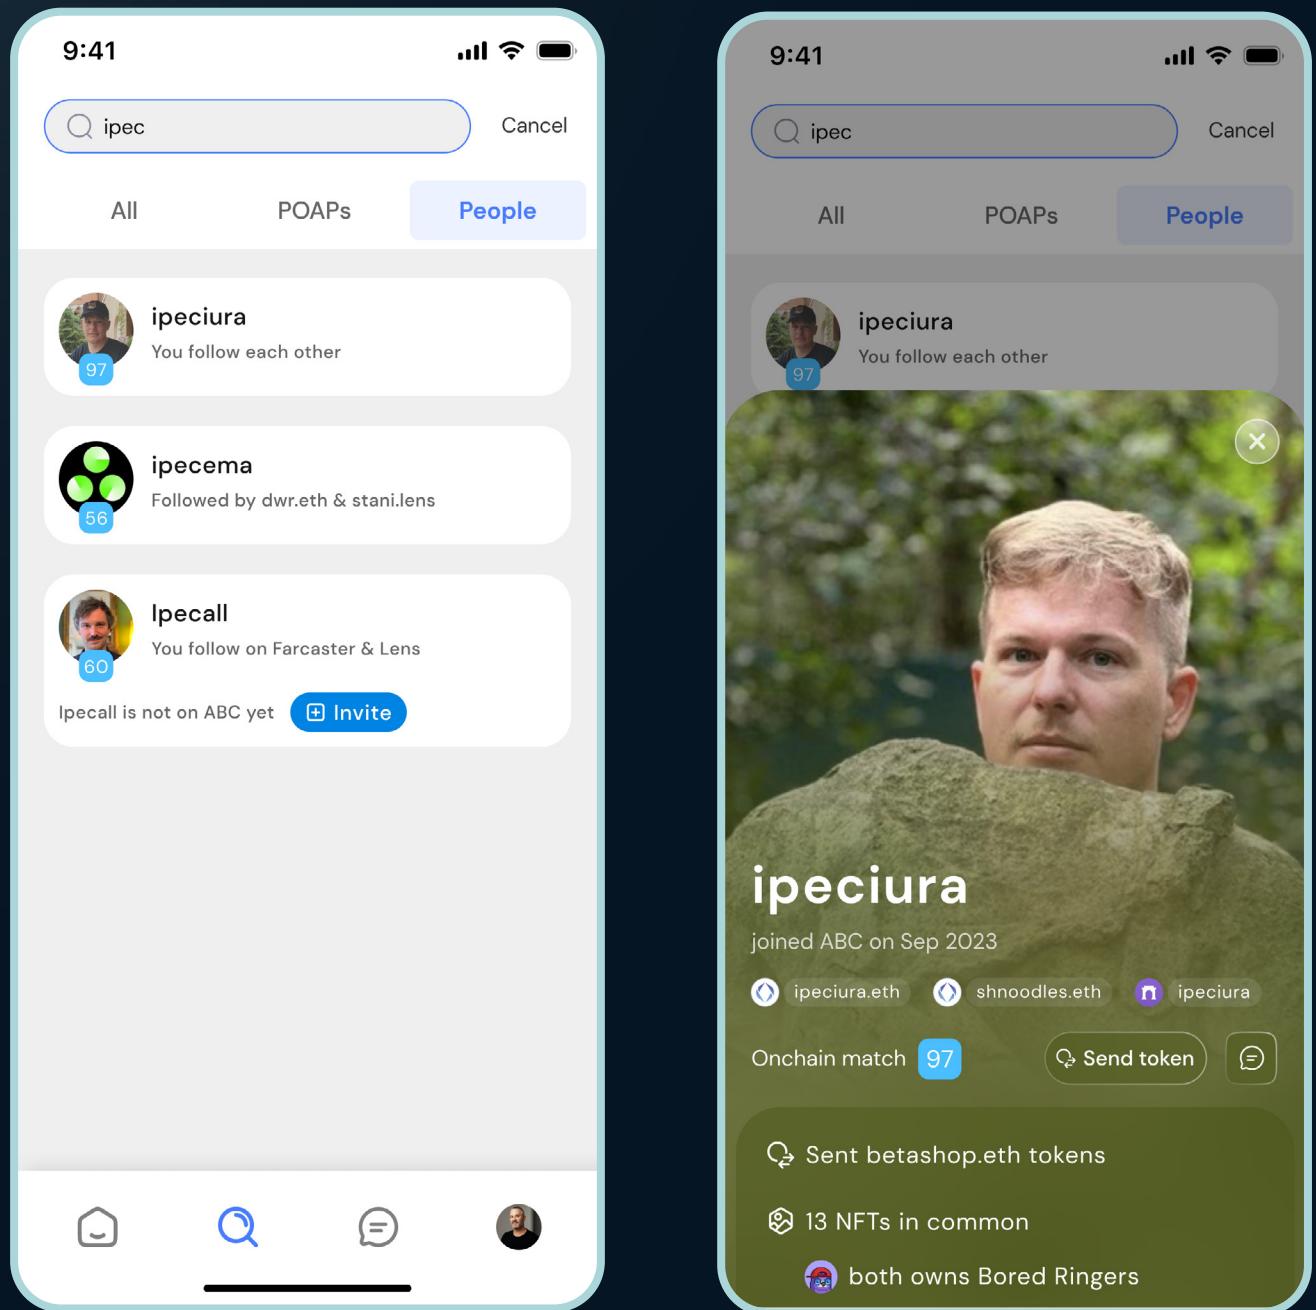

- ▷ NFTs — along with all metadata and images resized in various formats
- ▷ POAPs
- ▷ ERC-20 Tokens
- ▷ 6551 Tokenbound accounts
- ▷ Filter to Mints only
- ▷ Filter by date or blockstamp

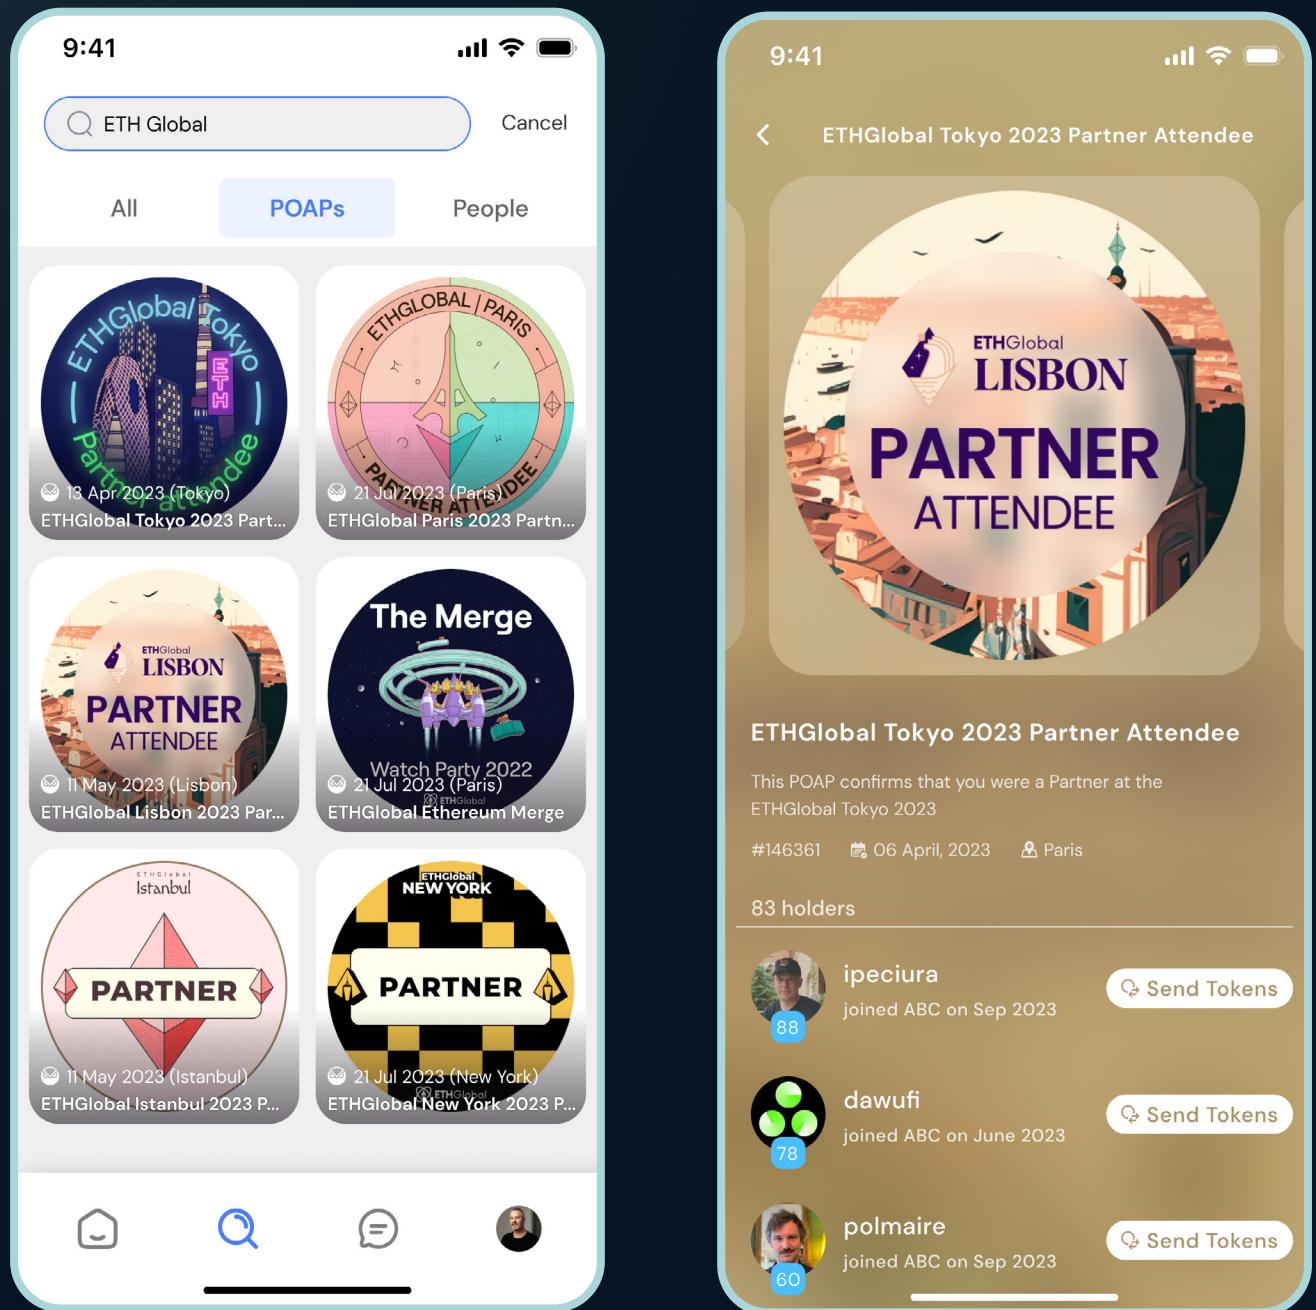

- ▷ Realtime balance snapshots: filter holdings by date or blockstamp
- ▷ View multi-chain balances

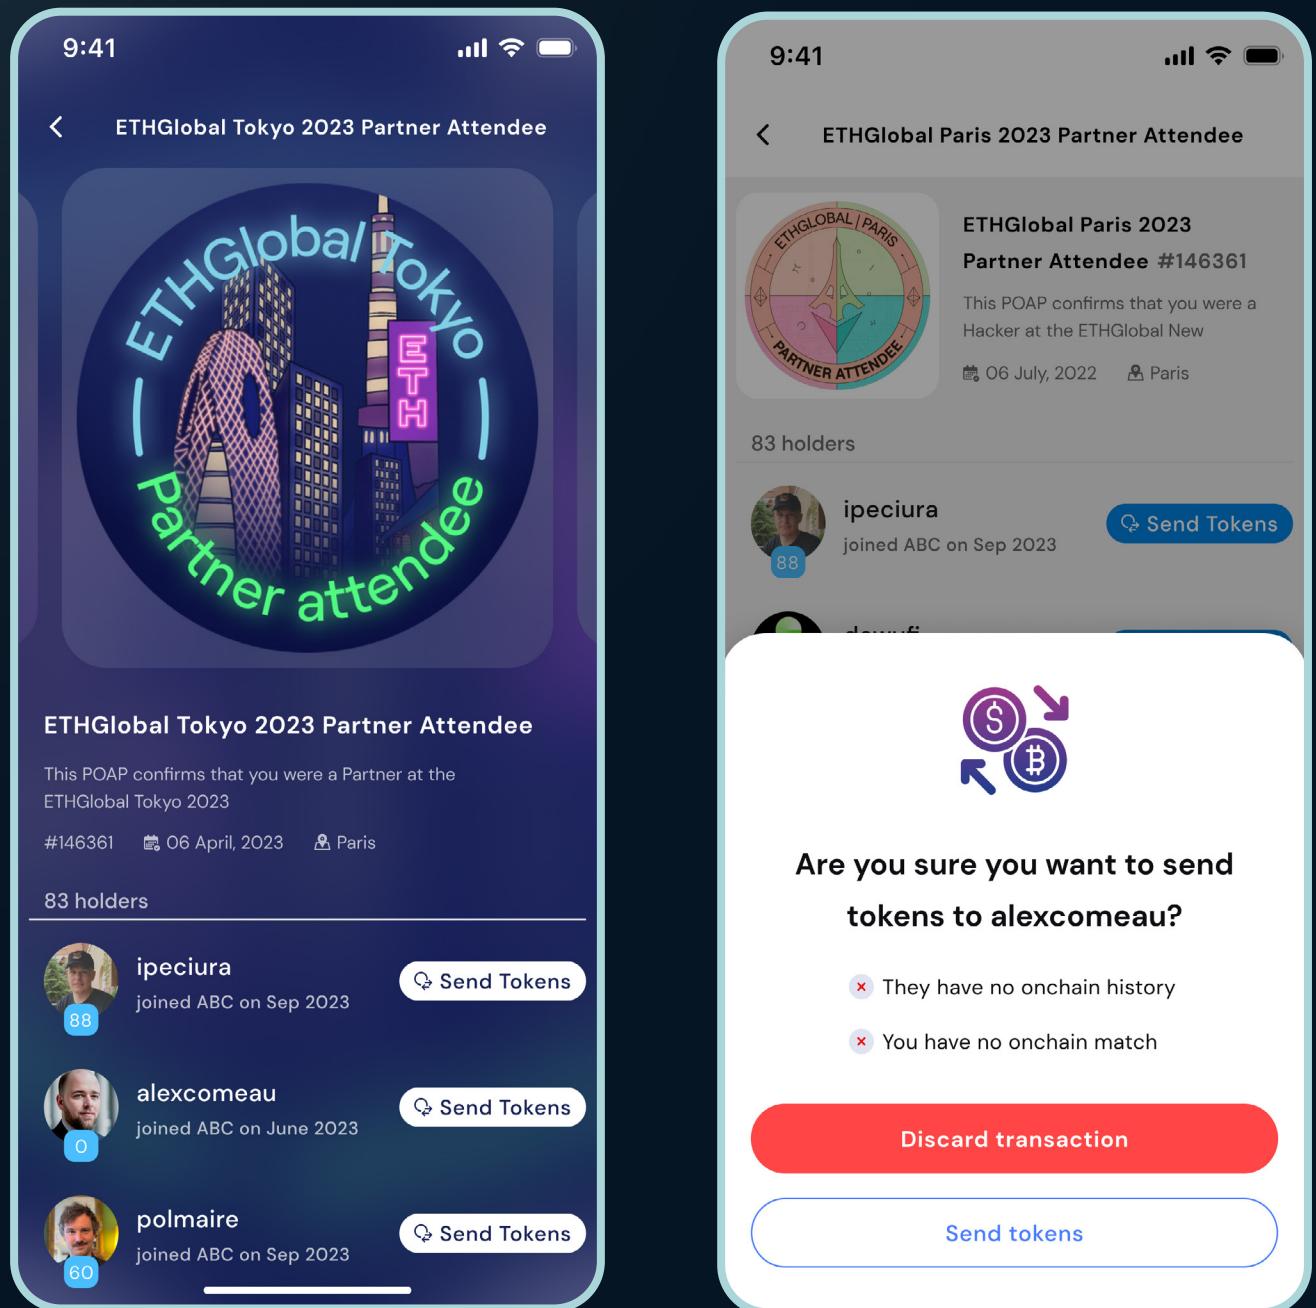

- ▷ Drill down into users' Tokenbound accounts
(NFTs that own other NFTs and tokens)

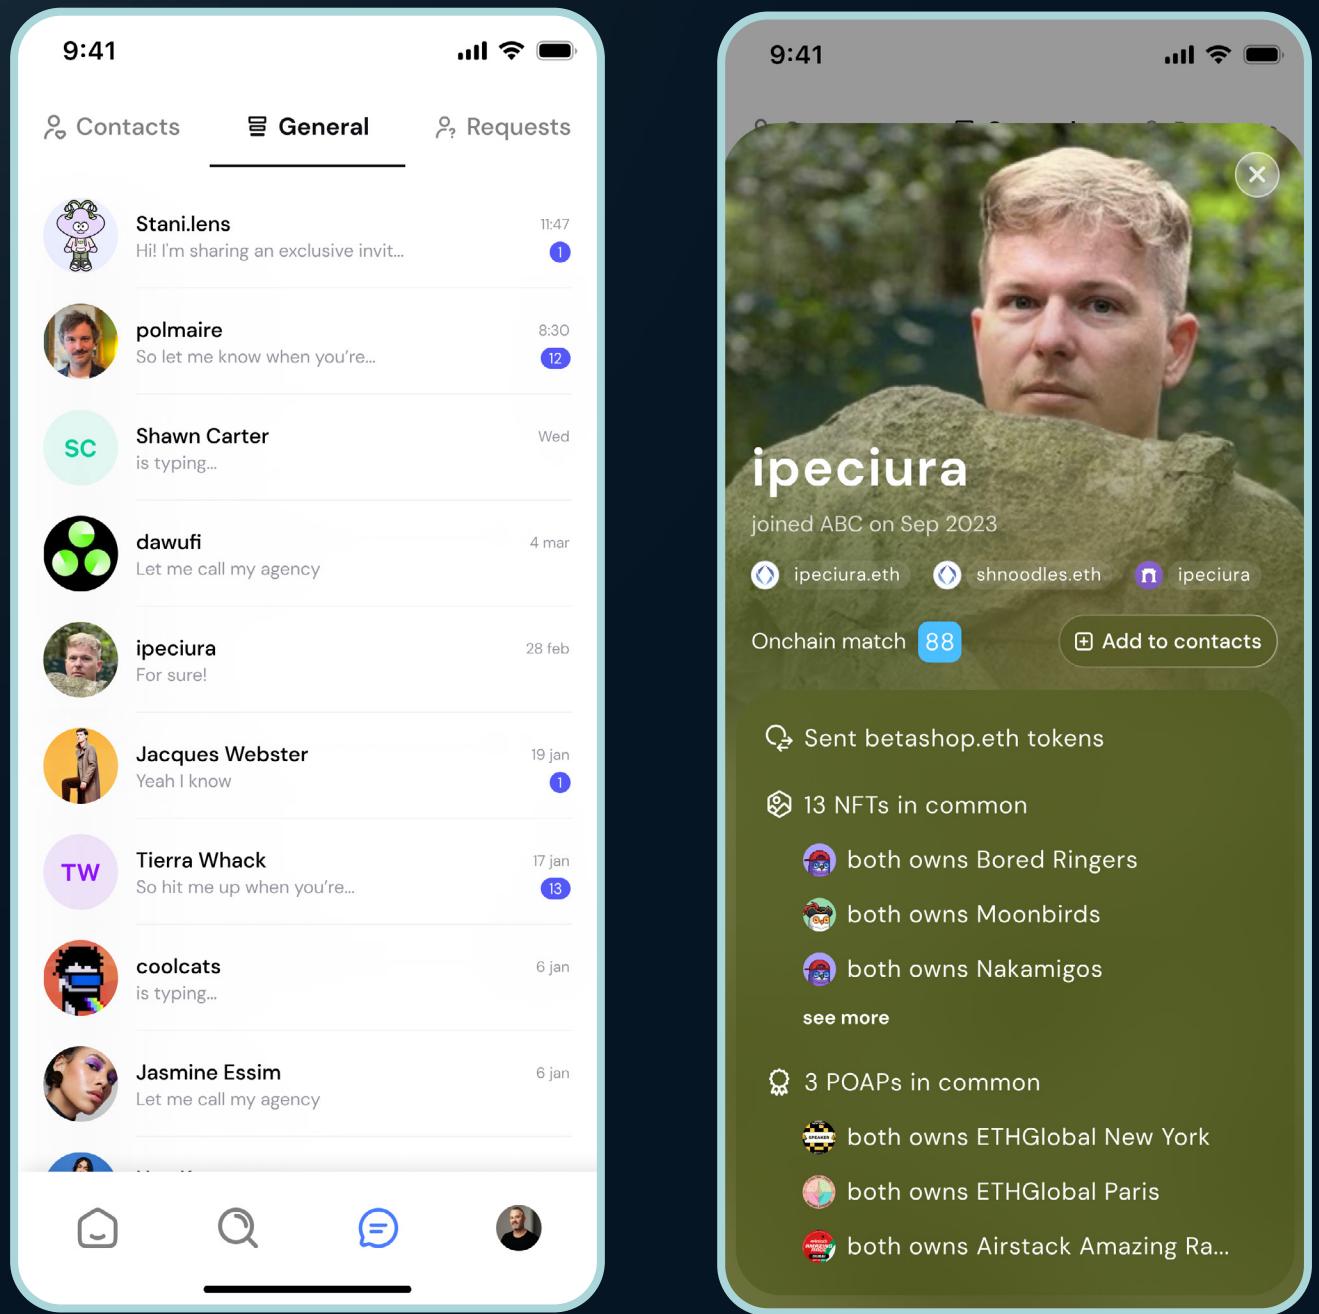

- ▷ Search with autocomplete for all profiles across Farcaster and Lens
- ▷ Display user relationships
- ▷ No backend required

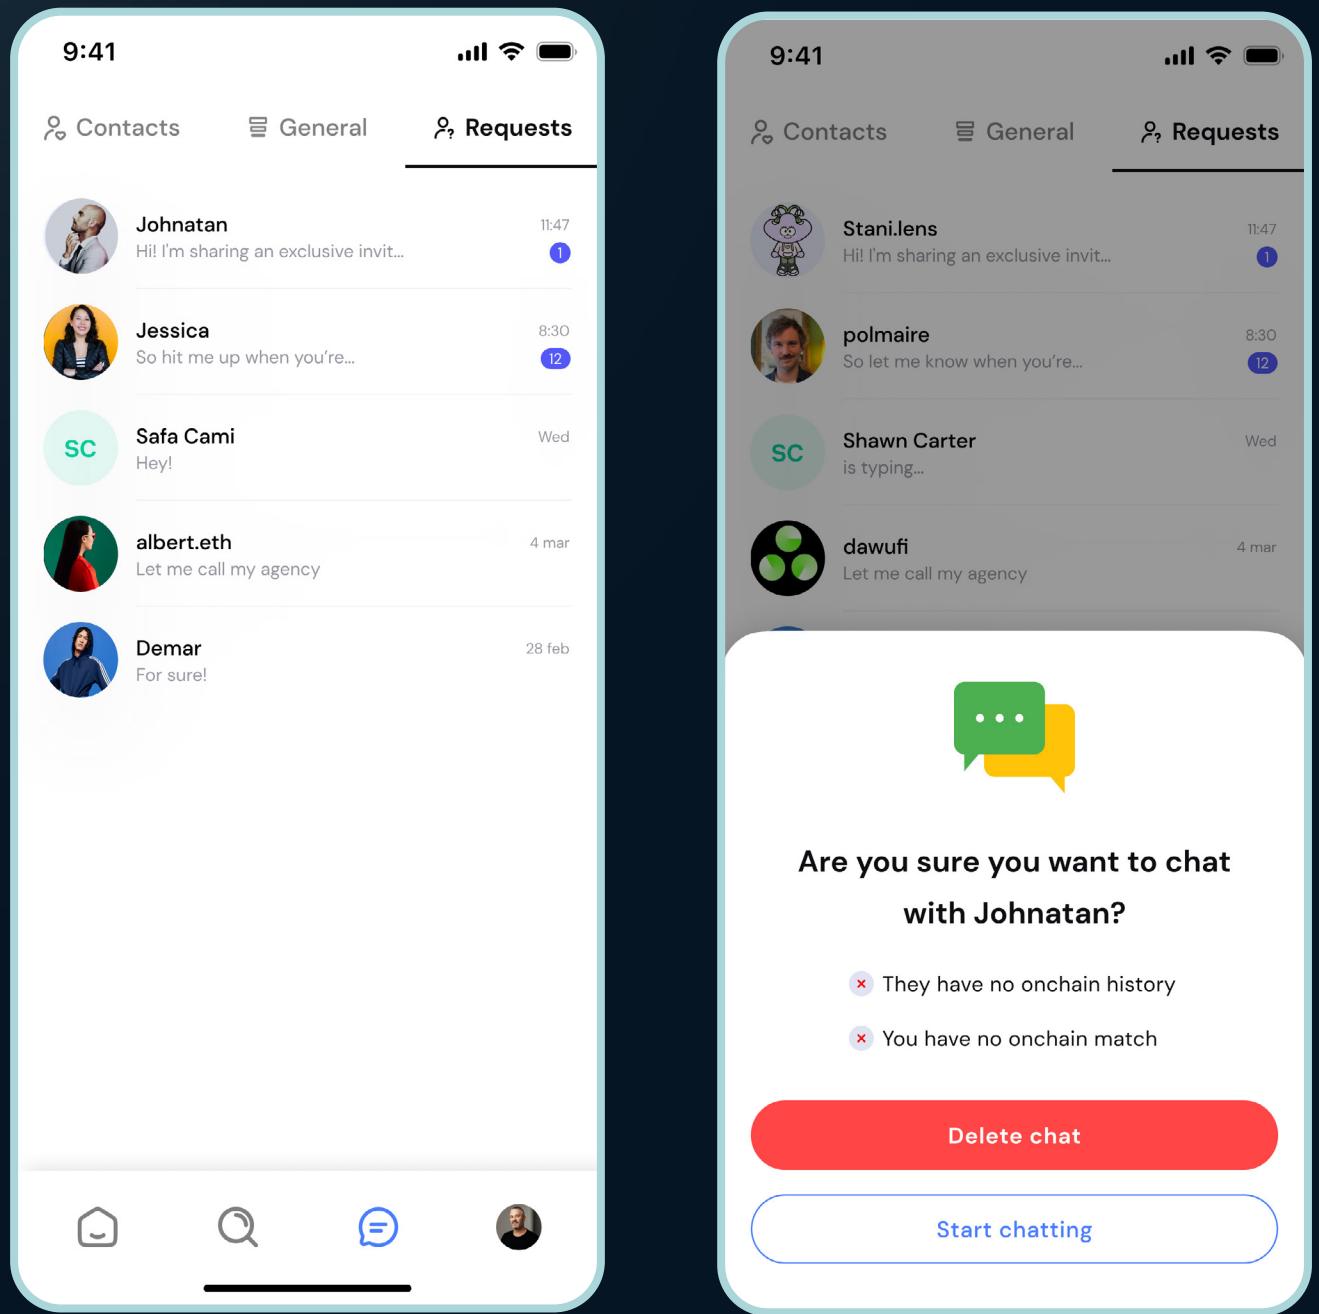

- ▷ Search for POAPs with auto-complete
- ▷ Fetch all event details, metadata, images in resized formats
- ▷ Drill down on attendees
- ▷ No backend required

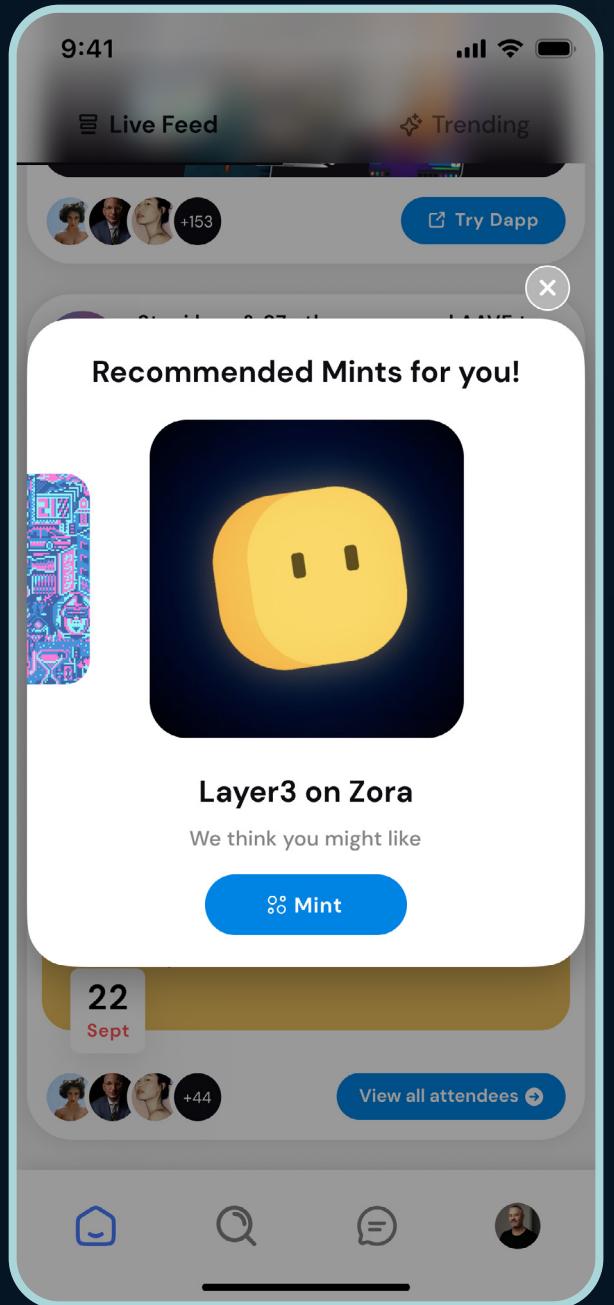

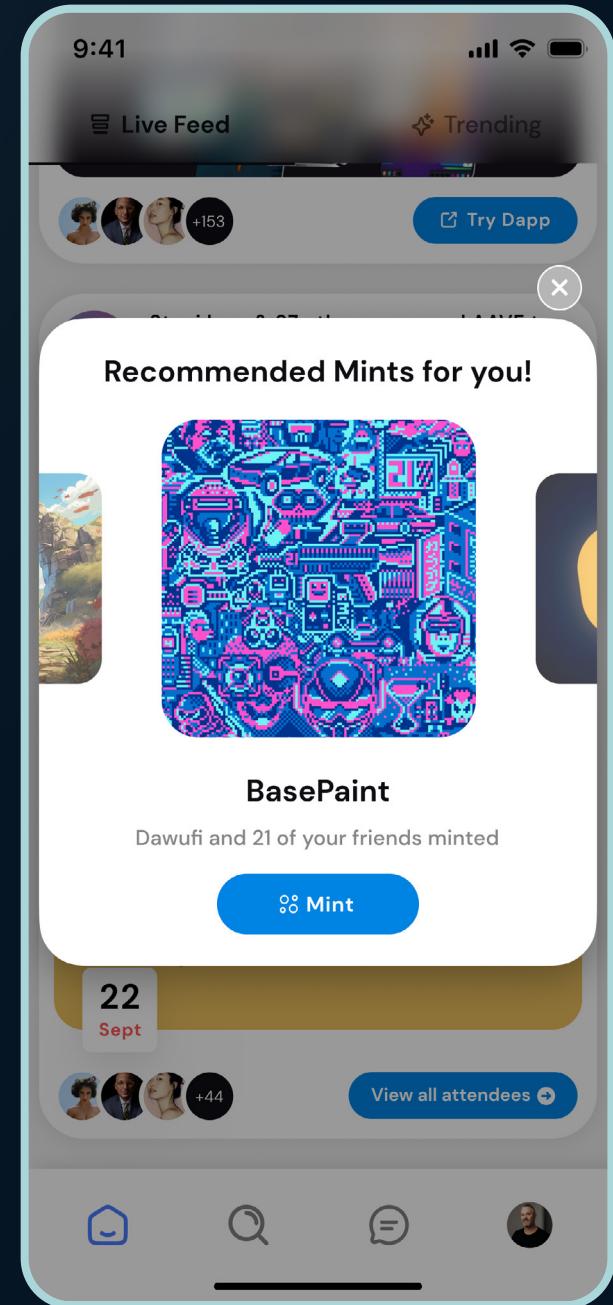

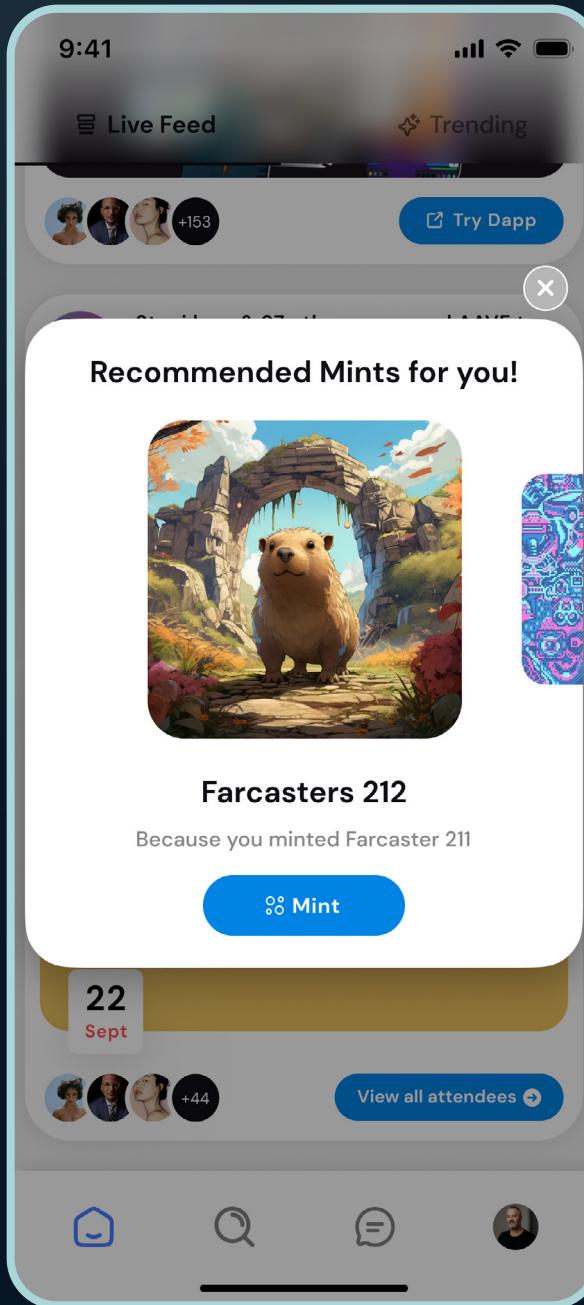

- ▷ Smart APIs to help you warn users before they take potentially harmful actions

▷ Spam filtration powered by
Airstack Onchain Graph

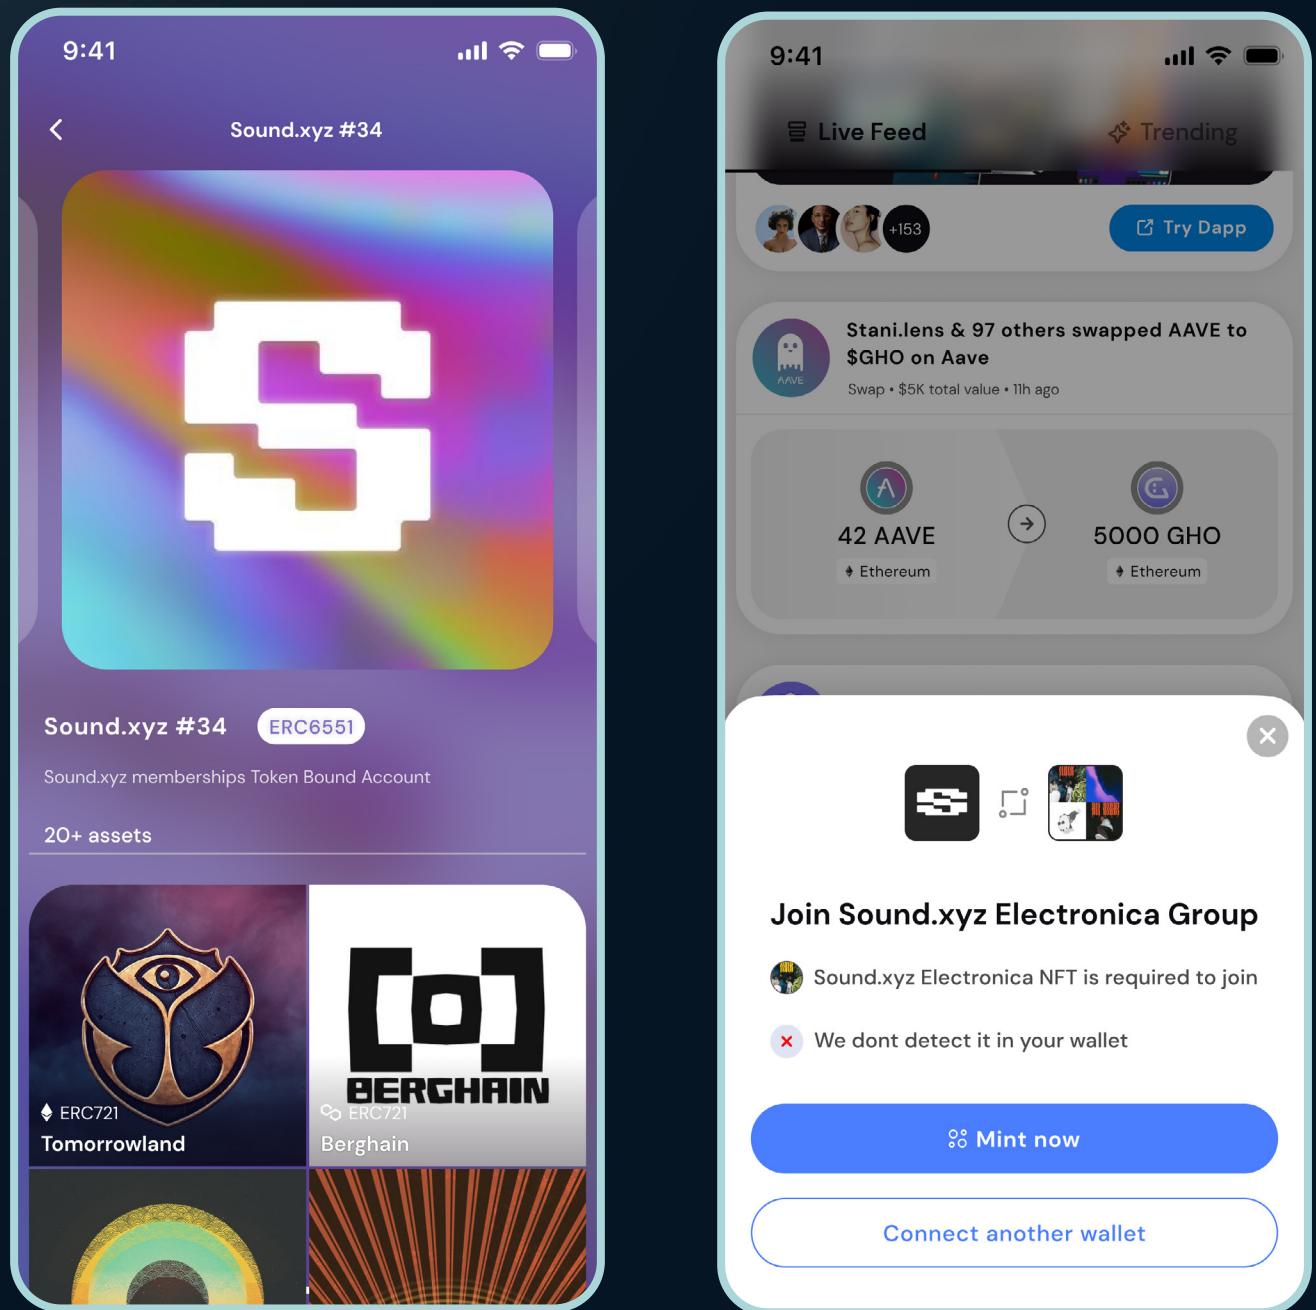

▷ Spam filtration powered by Airstack Onchain Graph

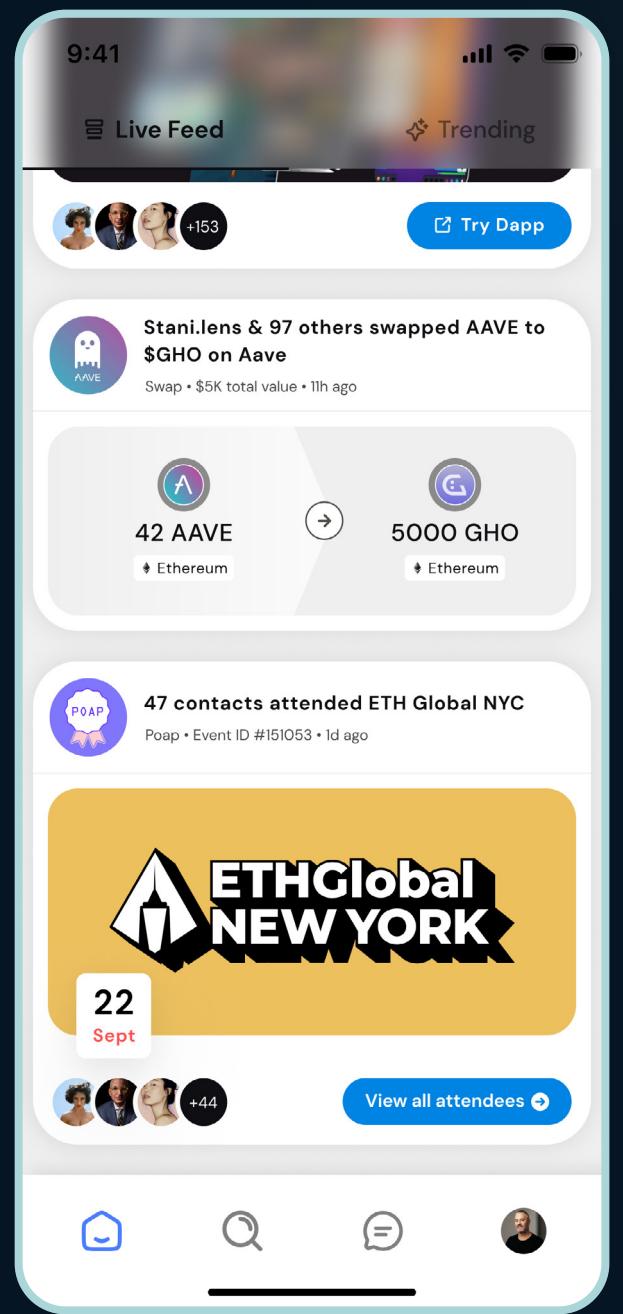

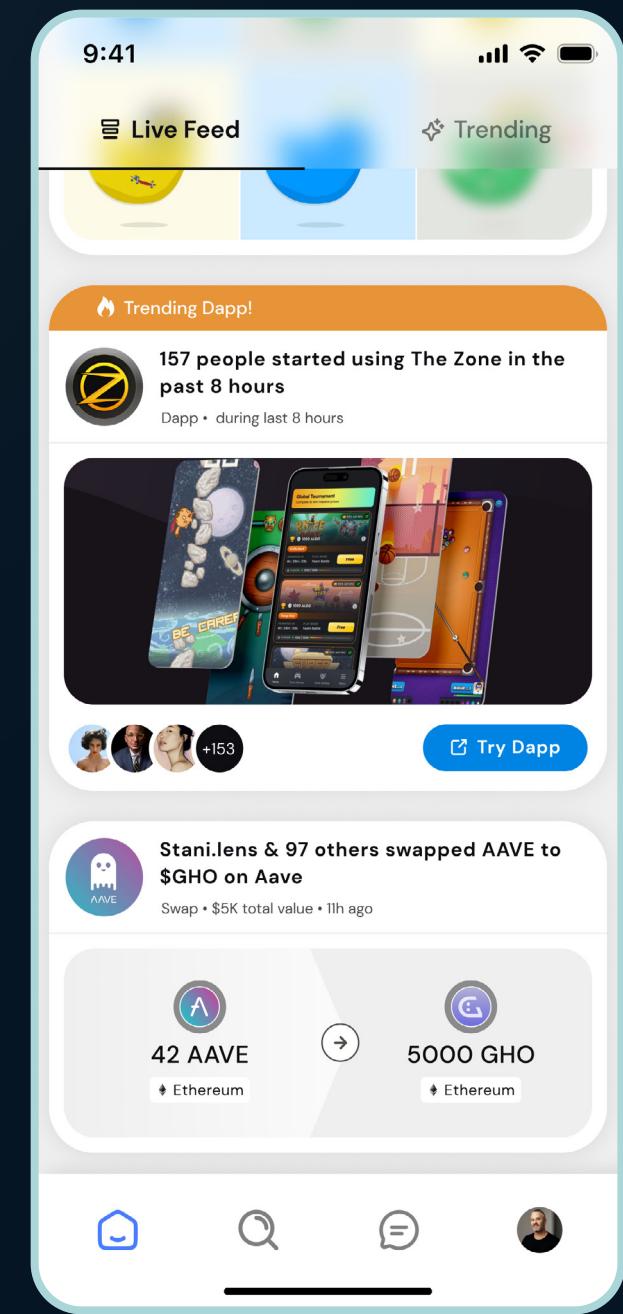

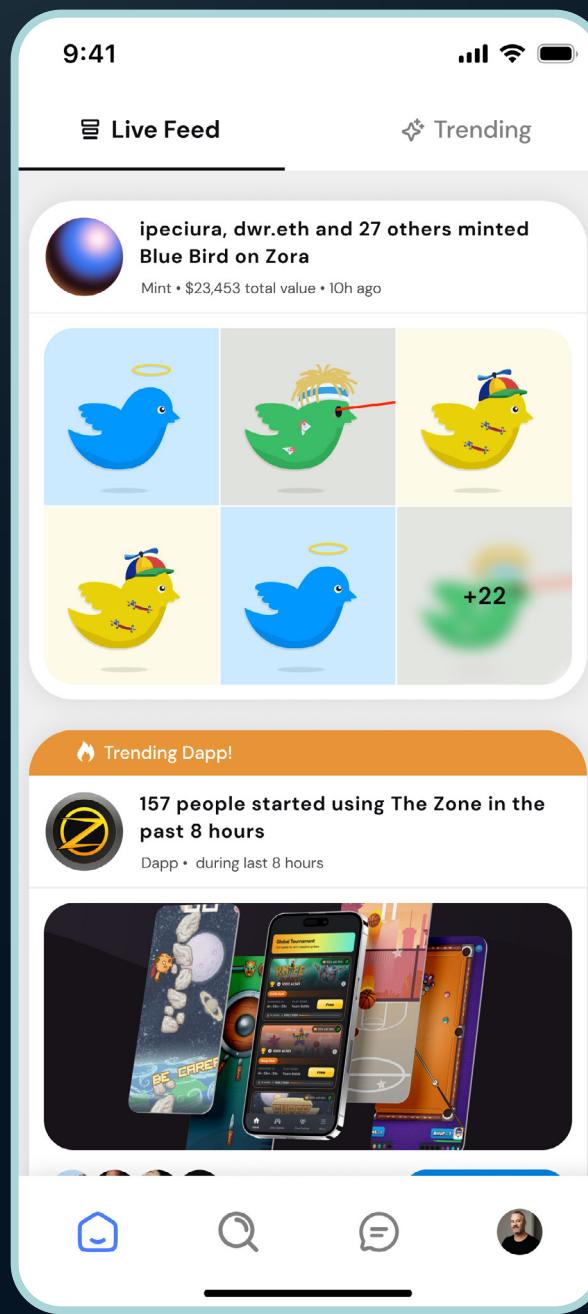

- ▷ Recommend NFT mints
- ▷ Users who did X also did Y
- ▷ Your friends minted
- ▷ Based on your onchain graph & history

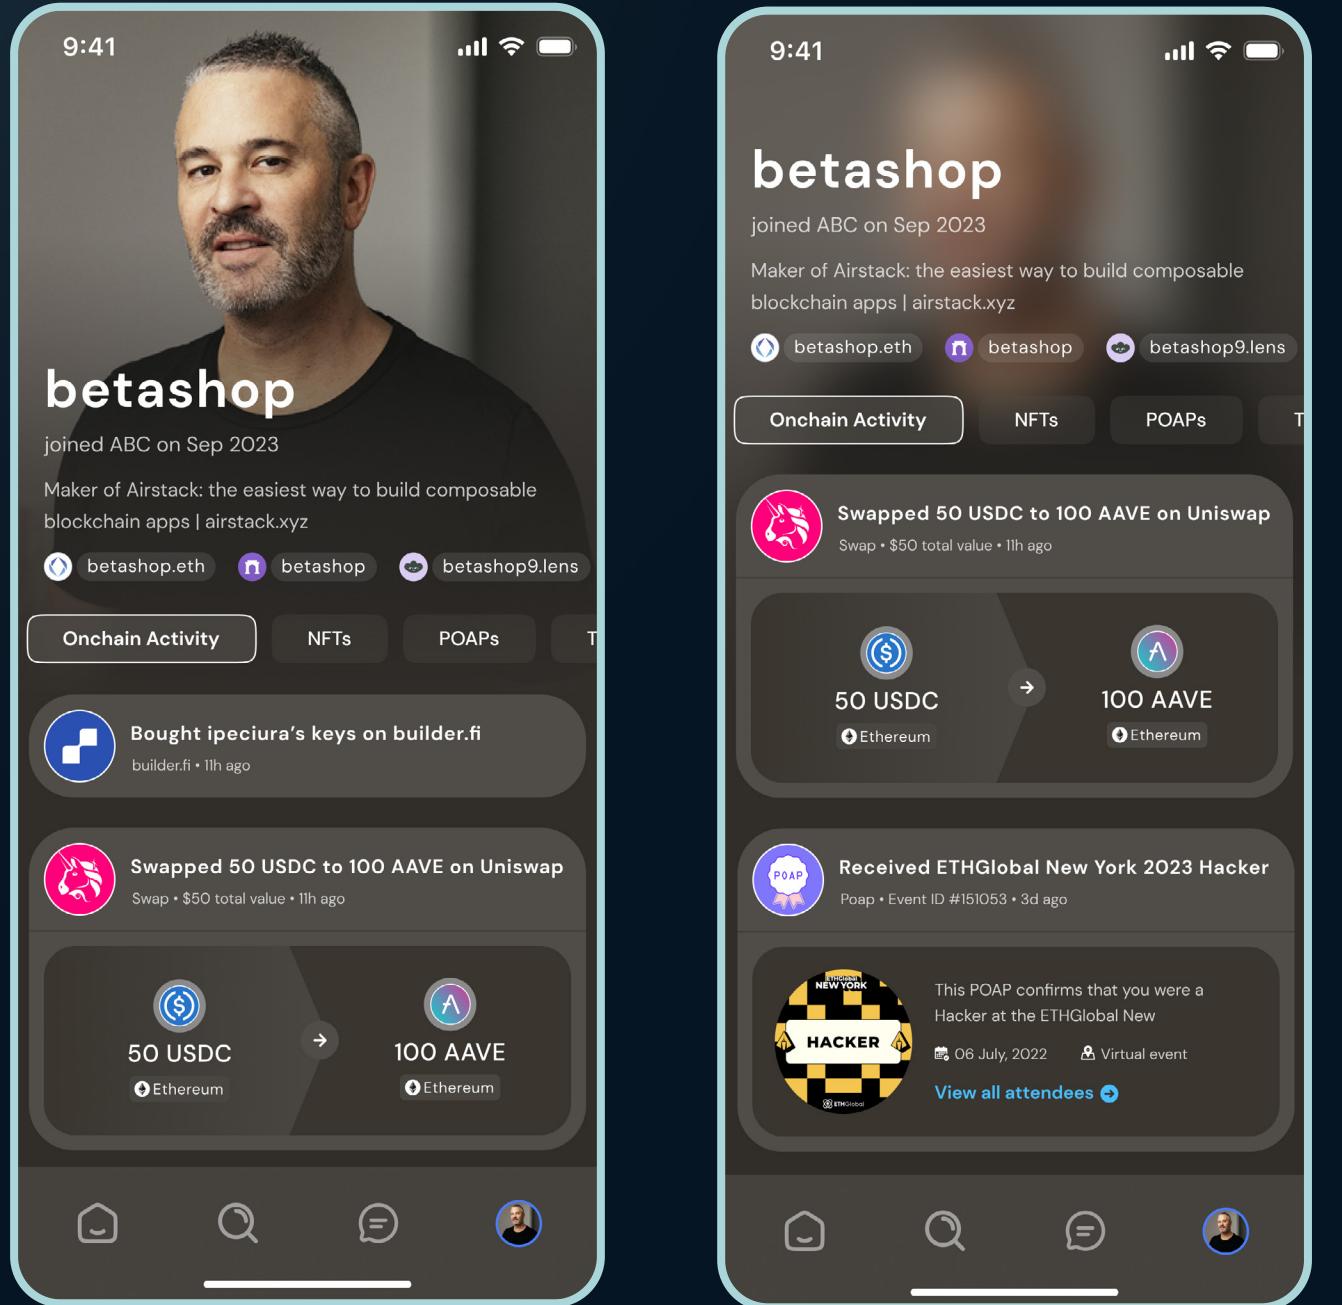

- ▷ Send engaging push notifications for Recommended Mints

- ▷ Tokengate memberships, groups or content
- ▷ Tokengate with ERC-6551 tokenbound accounts

- ▷ Recommend Mints (now)
- ▷ Recommend POAPs (now)
- ▷ Recommend dapps (Q1 2024)
- ▷ Recommend swaps (1H 2024)

- ▷ Create engaging activity feeds with all of the user's dapp interactions
- ▷ (in development, Q1 2024)
